Court of Appeals Calendar. ALBANY, Oct. 6.—Court of Appeals calendar for Monday: Nos. 66 and 255; old calendar, and Nos. 66 69, 71, 73 and 78. FINANCIAL AND COMMERCIAL.

FREDAY, Oct. 6. Estimates furnished by the bunks of a said loss by these institutions during the week varying between \$6,000.000 and \$7,000.000 were in view of the exhibit made in last week's bank statement, more or less cynically received by the financial community to-day. Similar estimates, whose most prominent feature was an atmobilely entablished loss by the bunks of nearly a week ago to-day yet, somehow during the succeeding twenty-four hours, the tunes gained from an unknown source enough money to turn this large loss into a found crault balance. Well Street argued forday that if such an event could take place last wook if could take place this weets as well, and that it was likely to take place if powerful financial interests desired it. There was honce no foreboding over he showing likely to be made in to-morrow's back return. This more cheerful feeling was also encouraged by a fall in money rates the Stock Exchange to low figures in the later afternoon, although this decline manifestly occurred because all except a rery small proportion of the day's borrowing terrain is had been filled early in the city and ntending lenders who had seen holding beir money to take advantage of a possine accessed in the afternoon were compelled offer their money at what they could et for it. The greater quantity of the day's leans were made in the neighborhood of 7 per cent. All the foreign markets were again heavy and dispirited to-day, the scarcity of money there restricting speculative operations and giving a weak uncertain tone to whatever small traing there was. In Berlin and Paris the time of sterling and discount rates was a triving way more favorable to values rates for the use of money in the open marer advanced on what was said to be borowing for the Bank of Lagand in order make the Bink's 4 per cent. discount elective. Prelictions were current London that as soon as the Bank did

acquire control of the money market it would, in view of its ow reserves and the iemands addressed there for money, esfrom New York, again raise its disand rate another 1/2 or 1 per cent. Curious reports were also prevalent as to the gold en agements of other countries in Paris. It was stated yesterday that an amount og iva ent to \$4,400,000 had been taken from the Stak of France for shipment to London, although gossip assonssigned Berlin as the destination of the shipment. To-day the story was that \$4,500,000 had been bought in Paris by our bankers, but there was no confirmation of this during business hours, and whether all these rumors did or did not refer to the one engagement supposed to have been made in Paris yesterday was not known. Sterling ex hange, which was at one time during the day considerably weaker than yesterday, rallied finally, so that its net fall was only about 5 points; but any weakness in sterling exchange. however small, is at the moment a favorable factor in a stock market sense. A little buying of the railroad list was no doubt induced after midday by the publication of various statements of railway earnings The Union Pacific and Southern Pacific systems reported net increases for August of \$467,177 and \$386,402 respectively; but, on the other hand, the Missouri Pacific's September gress decreased \$483,371, and in some quarters there was a disposition to consider as disappointing the semi-annual report of the United States Rubber Company, showing a decrease in net earnings of a little less than \$100,000. . The decline which occurred, however, in the price of the United States Rubber stocks was doubtless due more than anything else to the failure of the directors to gratify speculative hopes that had been raised concerning a distribution upon United States Rubber common stock. A development of no little interest was, finally, a further fall of nearly 1-3 of a cent in the price ing cotton options. It is evident that there has taken place a more or less complets collapse in the ill founded speculation for the rise in cotton that has recently been carried on here, but it is also clear that the Southern planters are not, nevertheless, marketing their cotton with great rapidity Fluctuations in stock market valuations to-day were unimportant, the closing quotations of the leading stocks differing very little from those of yesterday. The general market was weak in the fore part of the day and recovered later when money
